

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ yoe and expertise in Node and React, building scalable microservices and high-performance, secure applications.

EDUCATION

Birla Institute of Technology and Science, Pilani
Master's of Technology, Software Engineering, CGPA: 8.4
Aug 2022 – Jul 2024

Dayanada Sagar Academy of Technology
Bachelor's of Engineering, Computer Science, CGPA: 9.2
Jun 2018 – Jul 2022

WORK EXPERIENCE

SAP Labs, Bangalore

Aug 2022 – Present

Developer

- Spearheaded development of scalable applications in SAP Datasphere (Business Data Cloud) using **Node.js** with **Typescript**, supporting 10K+ active users and improving system throughput by 25%.
- Contributed to SAP Concur's expense report module, specifically optimizing bill/receipt upload workflows, handling 5K+ uploads/day and improving upload success rate by 20%.
- Architected and built a real-time onboarding monitoring platform using **React.js** and **Node.js** with **Express.js**, supporting 5+ global data centers and enabling visibility into 2K+ customers events/day.
- Designed distributed data aggregation pipelines processing 10K–15K records/day, reducing API latency by 30% and improving data processing efficiency by 40%.
- Created and maintained 20+ RESTful APIs using **Node.js** and **Nest.js** for microservices integration, ensuring 99.9% uptime and seamless inter-service communication.
- Implemented robust backend **security** features including **OAuth2/JWT**, **RBAC**, HMAC signatures, **XSS** protection, session hijacking prevention, and geo-blocking, reducing potential vulnerabilities by 40%.
- Integrated AI/ML capabilities by leveraging **generative AI** services, **AI Core**, **AI Hub**, **GitHub Copilot**, and **Joule**, building intelligent APIs that improved automation efficiency by 30% and reduced manual effort.
- Collaborated with cross-functional teams (CLM, CALM, Data Protection & Privacy, SAP Concur, WalkMe) to deliver scalable product features impacting multiple enterprise clients globally.
- Owned end-to-end feature delivery in an agile environment, including **system design**, **threat modeling**, code reviews, and production deployments, consistently delivering high-quality, maintainable code with faster release cycles (20% improvement).

SKILLS

Frontend: React, HTML, UI5

Backend: Javascript, Node.js, Express.js, Nest.js, Typescript

Databases: MongoDB, PostgreSQL, MySQL, SAP HANA

Frameworks and Tools: Git, Docker, Kubernetes, Jenkins, AWS

Testing: Mocha, JUnit, Jest, Chai, Karma, WebDriverIO, Selenium

PROJECTS

NGDCI Admin UI | UI5, Node.js, Express.js, Java

- Made an end-to-end dashboard to monitor real-time onboarding status across multiple datacenters.
- Designed system architecture, backend APIs, UI, and data aggregation logic from several data centers.

Covid Management System | React, Nest.js, MySQL, AWS

- Developed a full stack healthcare platform for booking tests, vaccinations, and managing patient workflows.
- Implemented admin features for managing hospitals, billing, and quarantine centers.

WatchParty App | React, NodeJs, WebSocket, AWS

- Created an app where users can create a party and watch together at once in real-time, with live chat functionality.

CERTIFICATIONS

- Space School (NASA, Houston, Texas)
- AI Ethics and Responsible AI (SAP)
- CS50 – Introduction to Computer Science (Harvard University)
- Google's IT Specialization (Coursera)
