PROFESSIONAL SUMMARY

Full Stack Developer with expertise in Java and React, building scalable microservices and high-performance, secure applications.

EDUCATION

Birla Institute of Technology and Science, Pilani <i>Master's of Technology in Software Engineering (CGPA: 8.4)</i>	Aug 2022 – Jul 2024
Dayananda Sagar Academy of Technology <i>Bachelor's of Engineering in Computer Science and Engineering (CGPA: 9.2)</i>	Aug 2018 – Jul 2022

EXPERIENCE

SAP Labs, Bangalore <i>Developer</i>	Aug 2022 – Present
--	--------------------

- Spearheaded scalable applications in SAP Datasphere (Business Data Cloud) using UI5 with Typescript, Node.js, and modern JavaScript frameworks.
- Architected and formulated a real-time onboarding monitoring platform using React and Java, supporting 5+ global datacenters.
- Designed distributed data aggregation pipelines handling 10K+ records/day, reducing API latency by 30%.
- Created and maintained RESTful APIs using Node.js and Java (Spring Boot) for microservices integration.
- Implemented backend security features including HMAC signature, XSS protection, session hijacking, and geoblocking.
- Setup real-time features using WebSockets improving data freshness and reducing polling overhead by 35%.
- Worked on AI-integrated endpoints for retrieving image insights and summaries.
- Collaborated with cross-functional teams (CLM, CALM, Data Protection and Privacy, SAP Concur, WalkMe) to deliver scalable product features.
- Improved system observability through logging and monitoring, reducing production issues by 20%.

PROJECTS

NGDCI Admin UI | *Node.js, Express, Java, UI5*

- Made an end-to-end dashboard to monitor real-time onboarding status across multiple datacenters.
- Designed system architecture, backend APIs, UI, and data aggregation logic from several data centers.

Covid Management System | *React, Java SpringBoot, MySQL, AWS*

- Developed a full stack healthcare platform for booking tests, vaccinations, and managing patient workflows.
- Implemented admin features for managing hospitals, billing, and quarantine centers.

Teleparty Netflix App | *React, NodeJs, WebSocket, AWS*

- Created an app where users can create Netflix party and watch together at once, with live chat functionality.

TECHNICAL SKILLS

Languages: Java, Spring, SpringBoot, JavaScript, TypeScript, Python, C, C++
Frontend: React, Angular, HTML, CSS, UI5
Backend: Node.js, Express.js, Nest.js, Java, Spring Boot
Databases: MongoDB, PostgreSQL, MySQL, SAP HANA
Frameworks and Tools: Git, Docker, Kubernetes, Jenkins, AWS
Testing: Mocha, JUnit, Jest, Chai, Karma, WebDriverIO, Selenium

CERTIFICATIONS

- Space School (NASA, Houston, Texas)
- CS50 - Introduction to Computer Science (Harvard University)
- Google's IT Specialization (Coursera)
