

PROFESSIONAL SUMMARY

Full Stack Developer with expertise in Java and React, building scalable microservices and high-performance, secure applications.

EDUCATION

Birla Institute of Technology and Science, Pilani

Master's of Technology, Software Engineering, CGPA: 8.4
Aug 2022 – Jul 2024

Dayanada Sagar Academy of Technology

Bachelor's of Engineering, CGPA: 9.2
Jun 2018 – Jul 2022

WORK EXPERIENCE

SAP Labs, Whitefield Bangalore

Aug 2022 – Present

Developer

- Spearheaded scalable applications in SAP Datasphere (Business Data Cloud) using **UI5** with **Typescript**, **Node.js** and modern JavaScript frameworks.
- Contributed to SAP Concur by working on the expense report module, specifically handling bill/receipt upload functionality.
- Architected and formulated a real-time onboarding monitoring platform using **ReactJs** and **Java**, supporting 5+ global datacenters.
- Designed distributed data aggregation pipelines handling 10K+ records/day, reducing API latency by 30%.
- Created and maintained **RESTful APIs** using **Node.js**, **Nest.js** and **Java (Spring Boot)** for microservices integration.
- Implemented backend **security** features including HMAC signature, XSS protection, session hijacking, and geoblocking.
- Setup real-time features using WebSockets improving data freshness and reducing polling overhead by 35%.
- Integrated AI/ML capabilities by working with **generative AI** services, **AI Core**, **AI Hub**, **GitHub Co-pilot** and **Joule**, building APIs to enable intelligent automation and endpoints retrieving data-driven real-time insights and summaries.
- Collaborated with cross-functional teams (CLM, CALM, Data Protection and Privacy, SAP Concur, WalkMe) to deliver scalable product features.
- Improved system observability and debugging by enhancing logging, monitoring, and error handling, reducing and solving production issues and mean time to resolution (MTTR) by ~20%.
- Contributed to end-to-end feature ownership in an **agile** development environment, including **system design** discussions, threat modelling, code reviews and production deployments, consistently delivering high-quality, maintainable code.

SKILLS

Languages: Java, Spring, SpringBoot, JavaScript, TypeScript, Python, C, C++

Frontend: React, Angular, HTML, CSS, UI5

Backend: Node.js, Express.js, Nest.js, Java, Spring Boot

Databases: MongoDB, PostgreSQL, MySQL, SAP HANA

Frameworks and Tools: Git, Docker, Kubernetes, Jenkins, AWS

Testing: Mocha, JUnit, Jest, Chai, Karma, WebDriverIO, Selenium

PROJECTS

NGDCI Admin UI | Node.js, Express, Java, UI5

- Made an end-to-end dashboard to monitor real-time onboarding status across multiple datacenters.
- Designed system architecture, backend APIs, UI, and data aggregation logic from several data centers.

Covid Management System | React, Java SpringBoot, MySQL, AWS

- Developed a full stack healthcare platform for booking tests, vaccinations, and managing patient workflows.
- Implemented admin features for managing hospitals, billing, and quarantine centers.

WatchParty App | React, NodeJs, WebSocket, AWS

- Created an app where users can create a party and watch together at once in real-time, with live chat functionality.

CERTIFICATIONS

- Space School (NASA, Houston, Texas)
- CS50 – Introduction to Computer Science (Harvard University)
- Google's IT Specialization (Coursera)
